**Subject:** OR CZARA: Agriculture Review and summary of "loose ends"  
**Attachments:** OR CZARA Reference Tracking (landslides pesticides agriculture 071014).xlsx

Good morning,

Attached please find a copy of the tracking file, which has been updated and completed (with exceptions noted below) for agriculture.

Please note the following questions/comments on the agricultural comments (this includes the notes/questions from Amy's July 7 email):

- We are uncertain about rows 100 and 101. There were no associated comment summaries. If we receive clarification, we can complete these (they are highlighted in yellow).
- Row 158-163 – these comments had duplicate numbering for letter 57.

For the agriculture ones we did complete, we could not locate a handful of references. These include:

- Row 92: Oregon Department of Agriculture. ?. Scientific Basis for an Outcome-based Water Quality Management Program.
- Row 105: EPA/NOAA's response to Oregon's Submittal of Additional Information on the State's Measures for Agricultural Sources in response to Federal Findings of January 1998, December 31, 2002, comments 4-5. If the Oregon CNPCP plans to rely on voluntary programs to implement the program, a back-up water quality authority is necessary.
- Row 111: Upper Willamette AWQMP 38-39
- Row 129: letter on file with author
- Row 171: OAR 141.085.0010(27). Oregon Administrative Rules. Chapter 141. Division 85.

In addition, a few loose ends remain in the landslides and pesticides comments. You likely have seen these in previous emails but I am including here so that everything outstanding to date is compiled in one place.

For the landslide category, we are still missing a few references – I am aware that Chris has been communicating with Elizabeth on tracking these down.

- Row 27: National Council for Air and Stream Improvement, Inc. (NCASI). 1985. Catalog of landslide inventories for the Northwest. Technical Bulletin 456. Research Triangle Park, NC. National Council for Air and Stream Improvement, Inc. (Chris is sending a hard copy to Elizabeth to scan, so really this one is accounted for.)
- Row 33: Doug Batemen. OSU. Personal communication.
- Row 47: Amanda Punton. 2006. Personal communication to Robert Baumgartner (Oregon state official). September 20, 2006.

And for pesticides, we are missing one document:

- Row 61: Norris, L.A. and P. Charlton. 1995. Determination of the effectiveness of herbicide buffer zones in protecting water quality, p. 147-152. In: G.J. Doucet, C. Sequin, and M. Giguere (eds.). Proceedings: Fifth International Symposium on Environmental Concerns in Rights-of-way Management. 9/19-22/1993. Hydro-Quebec, Montreal, Canada.

And there is another pesticides comment that is awaiting Jenny's review:

- Row 54 (57-CF-A)

If any of you have or know where we can find the missing documents, please let us know and we will review them to finish up the landslides, pesticides, and agriculture categories. We received the references for riparian comments and

have begun checking on those.

Thank you!

-Jennifer
